

Manhole Odor Problems?

Put an end to those nuisance odor complaints resulting from sewer odor escaping from manholes with the **NØDOR™ Manhole Odor Eliminator**. A cost effective, user friendly odor control system designed specifically for the removal of hydrogen sulfide and other reduced sulfur based odors from sewer manholes.

Each filter includes a custom made insert adapter that rests on the lip of the manhole frame. The outer diameter is custom made to your manhole frame dimensions (see reverse for sizing form). The inner diameter adapts to a replaceable, standardized odor filter cartridge that is easy and inexpensive to replace.

The insert adapter also serves to capture and drain away rain water. This prolongs the life of the carbon media by preventing the active ingredients from being washed out of the filter.

Features & Benefits

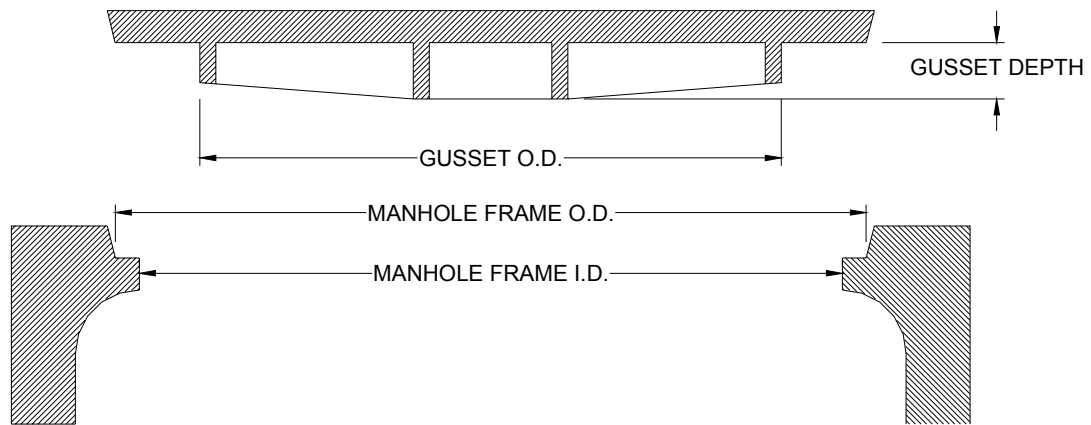

- **Low Cost**
Lowest total cost of ownership of any manhole odor filter
- **High H₂S Capacity**
Each cartridge has the capacity to remove up to 6.8 lbs of H₂S
- **Disposable Cartridge**
Two-piece design allows standard, inexpensive, disposable cartridge to be used in any size manhole
- **Breakthrough Sensor**
Simple visual inspection tells if cartridge needs to be replaced
- **Storm Ready**
Design routes water away from the cartridge extending carbon life
